

AISHWARIYA A

AI / ML Engineer

aishwariyaalwar@gmail.com · +91 87548 72173 · Thoothukudi, Tamil Nadu · [linkedin.com/in/aishwariyaa](#) · [github.com/AishwariyaAI](#) · [ai-portfolio-puto.vercel.app](#)

PROFESSIONAL SUMMARY

Motivated AI/ML Engineer (Fresher) with hands-on experience building end-to-end machine learning, deep learning, and Generative AI pipelines. Proficient in NLP, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), computer vision, and multimodal systems. Skilled in model development, training, evaluation, and deployment using industry-standard frameworks. Eager to contribute to AI/ML product teams and solve real-world problems through data-driven solutions.

TECHNICAL SKILLS

Programming Languages	Python, SQL
Machine Learning	Supervised & Unsupervised Learning, Classification, Regression, Clustering, Feature Engineering, Hyperparameter Tuning, Model Evaluation
Deep Learning	ANN, CNN, RNN, LSTM, Autoencoders, Transfer Learning
NLP & Generative AI	Tokenization, Word Embeddings, Transformers, LLMs, Prompt Engineering, RAG, Vector Databases, Semantic Search
Frameworks & Tools	PyTorch, Scikit-learn, Hugging Face, LangChain, FAISS, Chromadb
Deployment & DevOps	Docker, FastAPI, Git, GitHub
Data Visualization	Power BI, Tableau, Matplotlib, Seaborn

INTERNSHIP EXPERIENCE

Generative AI Intern — Evolve Robot Lab, Chennai

May 2026–Present

- Applying Machine Learning concepts and techniques to develop data-driven AI solutions and gain hands-on industry experience.
- Learning and exploring Generative AI technologies, Retrieval-Augmented Generation (RAG), and AI Agent.
- Collaborating on AI projects, research, and experimentation to understand real-world applications of Machine Learning and Generative AI

PROJECTS

AI Incident Monitoring & Investigation System

- Developed an AI-powered incident monitoring platform using NASA predictive maintenance datasets for anomaly detection and incident analysis.
- Built machine learning models to identify potential equipment failures and classify incidents based on severity levels.
- Designed interactive dashboards and REST APIs for real-time monitoring, alert generation, and incident management.

Tech Stack: Python, FastAPI, Machine Learning, Streamlit, SQLite

AI Research Agent

- Developed an AI Research Agent capable of retrieving, analyzing, and summarizing information from uploaded documents using RAG architecture.
- Implemented semantic search, document embeddings, and LLM-powered question-answering for accurate information retrieval.
- Built APIs and workflows to automate research tasks and generate context-aware responses.

Tech Stack: Python, FastAPI, RAG, Vector Database

AI Medical Assistant

- Developed an AI-powered medical assistant using Retrieval-Augmented Generation (RAG) to provide context-aware responses from medical knowledge sources.
- Implemented document ingestion, vector embeddings, and semantic search to retrieve relevant healthcare information.
- Built an interactive interface that enables users to ask health-related questions and receive accurate, knowledge-based responses.

Tech Stack: Python, RAG, LLMs, FastAPI/Streamlit

EDUCATION

Sri Ramakrishna Engineering College, Coimbatore | CGPA: 7.94 / 10

2021 – 2025

Bachelor of Engineering — Robotics and Automation

CERTIFICATIONS

- Master Program in Data Science and Artificial Intelligence — FITA Academy, Chennai
